

觀霧 國家森林遊樂區

Guanwu
National Forest Recreation Area

園區歷史 HISTORY OF GUANWU

民國 54 年「觀霧工作站」成立，處理林業事務。民國 73 年直營生產事業結束。於民國 78 年工作站更名為「新竹林區管理處竹東工作站觀霧分站」，朝森林生態永續經營及森林生態遊憩活動為主；民國 84 年成立為「觀霧國家森林遊樂區」，藉由豐富生態資源與自然景緻的共有共享，達到推廣保育、教育與生態永續的目的。

Guanwu Station was set up in 1965, with forest management as its primary goals. Operations ended in 1984. In 1989, Guanwu Station was renamed Guanwu Branch, Zhudong Station, Hsinchu Forest District Office. Its main goals were sustainable forest management and recreational activities. In 1995, Guanwu National Forest Recreation Area was established, to promote conservation and ecological stability by sharing the abundant ecological resources and natural scenery.

大霸尖山 Mt. Dabajian

山勢磅礴壯麗，有「世紀奇峰」之美譽，是臺灣難得一見的冰河侵蝕切割的冰斗角峰，海拔 3,492 公尺，是當地泰雅族及賽夏族的聖山。大霸尖山、中央尖山與達芬尖山，合稱為「臺灣三尖」。

As one of the three steepest mountains in Taiwan, reaching an elevation of 3,492 meters, Mt. Dabajian is known for its steep terrain and rugged beauty. The mountain is holy to the indigenous Tayal and Saisiyat tribes.

泰雅祖靈紀念廣場 Tayal Ancestral Memorial Plaza

創作概念來自「祖靈之眼」，造型結構為現代意象裝置藝術。以一片片厚實巨木環形排列，象徵守護國家森林與祖先歷史命脈。

The Tayal Ancestor Memorial Plaza, a modern concept installation art, was inspired by the indigenous Ancestors' Eyes. Giant trees surrounded by planks symbolize the protection of the national forest and the historical lifeline of the Tayal ancestors.

Ecological Beauty of Guanwu

Guanwu is a coniferous and broad-leaved forest in the mid-altitude cloud zone of Taiwan. The most common trees are Taiwan Red Cypress, Taiwan Cypress, and Taiwan Red Pine. The most common Broadleaf trees are camphors, beeches, and oaks.

The scenery of the mountains in Guanwu changes with the seasons.

Spring is the season of the red and white flowers of the Taiwan Cherry, Wusheh Cherry, Taiwan Sassafra, and rhododendrons. White-eared sibias, Taiwan yuhinas, and yellow tits are chirping all around. Whited-faced flying squirrels chew on young leaves, as new buds brighten the beautiful mountains.

All things come alive in the **summer**. Flowers such as Kawakami hydrangea, grape-leaf anemones, and native impatiens bloom in the shade under trees. You might see Mikado pheasants walking in the woods, or Taiyal dragonflies resting by the water. When the night comes, tree frogs sing a rousing chorus while the summer breeze makes walking in the woods so light and soft.

Red leaves and beech and oaks take the stage in **fall** as reddening maples and green maples dye the peaks while beech and oak nuts ripen. Red-bellied squirrels and Formosan striped squirrels are busy storing food for the upcoming winter.

Falling leaves in **winter** come in many colors. Flocks of birds attract birders. When the leaves of the tall and upright Formosan Alder fell, it unveils the Formosan Alder Mistletoe in the tree crown. The Fire-breasted Flowerpecker are pecking at the flowers and enjoying its fruits. Sometimes at night, we can hear the Tawny Owl and the Brown Wood Owl singing winter songs in the freezing wind.

Beautiful in all four seasons, Guanwu is the best place to explore the beauty of nature in Taiwan.
